Call for Symposia Proposals

Special Focus Topics for 2008

AAA's Annual Meeting Program Committee is now seeking session proposals for the AAA Annual Meeting at EB 2008 (San Diego, April 5-9).

In addition to encouraging your topic ideas, the AAA Program Committee has selected six special focus topics for 2008. When submitting your proposal for a symposia, hybrid-symposia, or platform session, please consider these areas:

- Anatomy of Autism
- Tissue Engineering in 3D
- *In Vivo* Cell Fate in Real Time
- Emerging Technologies in Neural Protection
- Integrated Signaling Mechanisms in Development
- Generation of Morphological Diversity

If you're working in any one of these areas, this is your chance to put your research front & center! The **submission deadline is April 18**. The Program Committee meets on May 2 to select proposals and you'll be notified soon after about your selection and session funding.
