

Education

Poster #	Abstract Name	First (presenting) Author	Academic Level of First (presenting) Author
1	A Case Study on a Novel Teaching Method on Integumentary and Musculoskeletal Anatomy for First Year Medical Students in a National University in the Philippines (University of the Philippines College of Medicine) as a Potential Alternative to Traditional Cadaveric Dissection	Christopher Constantino	Faculty
2	The Use of DIY Isolated Nervous System Models for the Upper and Lower Limb in the Classroom: Preliminary Results	Randi Depp	Graduate/Medical Student
3	A Scalable Model for Fostering Flourishing in Medicine	Mary Piscura	Faculty
4	Student Feedback of a Lecture on Auditory System Anatomy From a Cultural Perspective	Peter Amua-Quarshie	Faculty
5	Will active learning replace lectures?	Angel Laboy	Graduate/Medical Student
6	Implementation and Rollout of an eDissection Manual in a Second Year Medical Student Neuroscience Module	Jacob Burke	Graduate/Medical Student
7	Scalpels and Surprises: A Surgical Case of a Complex Ventral Hernia Repair Compounded by a Necrotic Pancreatic Pseudocyst	Cayla Gilliland	Graduate/Medical Student
8	Ventriculoperitoneal shunt in older patient without significant cerebral atrophy	Emma Amjad	Graduate/Medical Student
9	"Understanding Sexually Transmitted Diseases: An Assessment of Participants' Knowledge of Etiology, Perceived Risk, and Self Efficacy"	Erin McGough	Graduate/Medical Student
10	Integrating Fresh Cadaveric Cross-Sections and Radiology in Pre-Clinical Anatomy Education: A Quality Improvement Study	Gabriele Brown	Graduate/Medical Student
11	Unlocking Learning: Evaluating Case-Based Learning vs. Escape Rooms for First-Year Dental Students	Muhammad Daniyal Shafqat	Faculty

Technology

Poster #	Abstract Name	First (presenting) Author	Academic Level of First (presenting) Author
1	"Advancing Interprofessional Anatomy Education: Integrating Mixed Reality for Enhanced Learning"	Arvie Vitente	Faculty
2	Elevating Anatomy Flashcards: Insights from Physician Assistant Students on New Gamification Features	Ivy Dunn	Graduate/Medical Student
3	Navigating the Integration of Point-of-Care Ultrasound in Undergraduate Medical Education: Fostering Clinical Diagnostic Skills from Anatomical and Imaging Perspectives	Gregory Brower	Faculty

Anatomical Science

Poster #	Abstract Name	First (presenting) Author	Academic Level of First (presenting) Author
1	Anomalous Psoas Quartus and Rare Femoral Nerve Branching	Joshua Wang	Graduate/Medical Student
2	Inhibitor of Differentiation 1 (ID1) is Overexpressed in Oral Squamous Cell Carcinoma and Cervical Cancer Tissues	Rishab Samant	Undergraduate Student
3	Spondylolisthesis Classification: A Review Article on Existing Systems and Their Limitations	Vincent Lee	Graduate/Medical Student
4	A combined morphometric analysis of the prehatchling American alligator cranium	Joshua gullace	Graduate/Medical Student

5	Sizing up an uncommon origin of the left vertebral artery	Rosemary Josenkoski	Graduate/Medical Student
6	The Use Of Adaptive Radiation In Retroperitoneal Seminoma Patients With Poor Candidacy for Chemotherapy: A Teaching Case	Michayla Brown	Graduate/Medical Student
7	Splenomegaly: Developing a Framework for Differential Diagnosis:Knowing Signs and Symptoms	Marsha Rutland	Faculty
8	A Case Study on Lumbar Hernia With an Abdominal Aortic Aneurysm	Haley Loan	Graduate/Medical Student
9	Variations and comparisons of common muscles of agenesis	Brendan Olson	Graduate/Medical Student
10	"Effects of Adolescent Social Isolation on Prelimbic Cortex Projections in Postpartum Mice"	Allyson Thammavongsa	Undergraduate Student
11	Modular swallowing performance in patients with ALS	Joseph Moore	Graduate/Medical Student
12	Clinical Significance of Intracranial Heterotopic Ossification: A Search for Etiology Using a Decedent Imaging Database	Andrew Norred	Graduate/Medical Student
13	Unraveling the Swallow: How Stroke Impacts Pharyngeal Swallowing Mechanics	David Dillard	Graduate/Medical Student
14	The Ventral Tubercle Story of C6: The Clinical Importance	Brittany Herrera Contreras	Graduate/Medical Student
15	Paraoesophageal hernia secondary to bladder carcinoma induced cachexia	John Mumber	Graduate/Medical Student
16	Sciatic nerve variations and their frequency between male and female cadavers	Jayden Olson	Graduate/Medical Student
17	An in-situ comparison of ACL and knee compartment structures between males and females	William Wakeland	Graduate/Medical Student
18	"Novel bilateral morphology variation of the fibularis tertius and extensor digitorum longus muscles"	Sara Zoghi	Graduate/Medical Student

Ethics

Poster #	Abstract Name	First (presenting) Author	Academic Level of First (presenting) Author
1	Tropical infectious disease prevalence in indigenous populations of Copan Ruinas, Honduras	Paul Oancea	Graduate/Medical Student
