# ▶ Identify Your Priorities

Carefully consider what *you* want in a graduate program. One person's dealbreaker may be another's minor inconvenience or desirable quality.

# Do Your Research

Find out whatever you can about the graduate program, especially how to apply!

Application Process

Deadlines

Required Materials

Check out what the people associated with the program are working on too!

Faculty

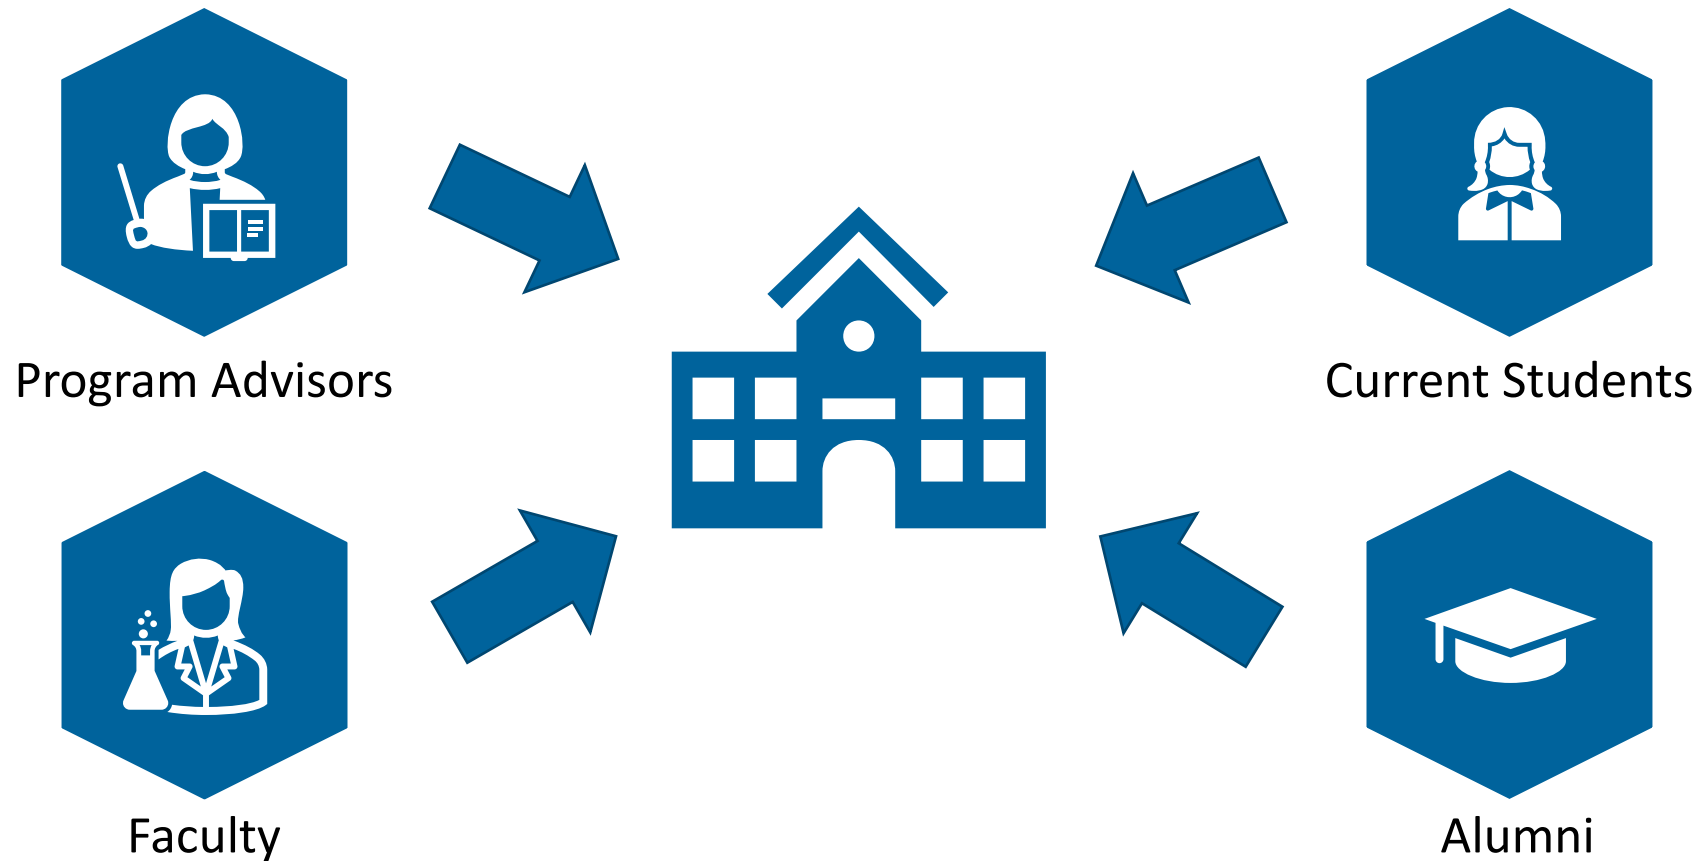

Current Students

Alumni

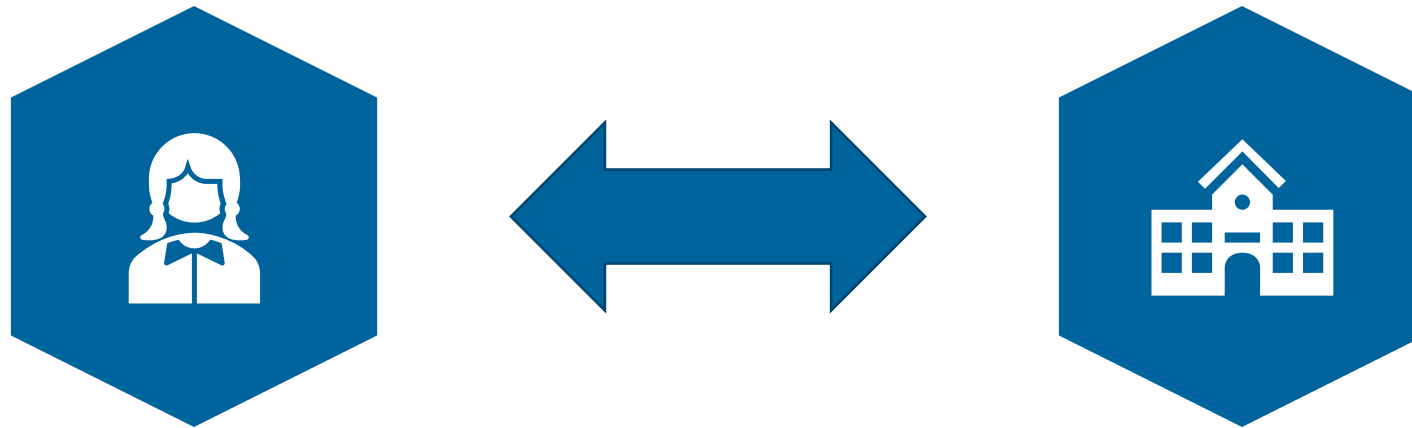

# ▶ Talk to EVERYONE

Reach out to the people and ask them about their experiences with the graduate program . Each person offers a unique perspective!

## ▶ Be True to Yourself

Fitting into a graduate program goes both ways. Admissions committees are trying to determine if you are a good fit for the program, but you should try and determine if *they* are a good fit for *you* as well.

Ask as many questions and gather as much information as you can to help you make your decision!

# Any Questions?
