RULES & GUIDELINES FOR AAA REGIONAL MEETING ABSTRACT SUBMISSION

All abstracts must be submitted electronically by 11/7/21, 11:59 pm PT. Authors will be notified the week of November 19th to the status of their submission. Each abstract should contain a sentence stating the study objective (unless given in the title); a brief statement of methods, if pertinent; a summary of the results obtained; and a statement of the conclusions. It is not satisfactory to say, "the results will be discussed." Use a short, specific title in title case. Do not put a period at the end of the abstract title. Abbreviations should be spelled out in full at first mention, followed by the abbreviation in parentheses. Exceptions: DNA, RNA, etc. Include the source of research support on the bottom line of the abstract.

• Only the first author may present the paper, unless prior approval has been received.
• The first author must read the Disclosure Policy and list any disclosures when submitting an abstract.
• Your abstract body must have a minimum of 100 characters and maximum of 3000 characters (not including spaces).
• There are 3 steps to the online submission page. On the first page of the submission form, you will enter the first authors (same as presenting author) contact information first. On the second page, you will enter the name, institution, department, city and state of each co-author. On the third page, is where you enter the abstract title, abstract body, funding information, disclosures and abstract topic.
• It is the first authors responsibility to make sure that all co-authors have read the abstract and approved their authorship on this submission. If you do not have approval from all authors your abstract will automatically be rejected.
• Authors are not permitted to submit an abstract on work that has previously been published. Exception: if additional data/research is added to a previously published abstract the abstract may be accepted.
• With regard to research using human subjects, AAA endorses the protections embodied in the Basic Principles of the Declaration of Helsinki and their expansion in the regulations governing research supported by the U.S. Government (45 CFR Part 46; 56 FR 28003). AAA does not endorse and will not publish the results of research that was not conducted in accordance with these Principles. Investigations involving animals reported in abstracts must have been conducted in conformance with the FASEB Statement of Principles for the use of animals in research and education.
• While it is rare for a submission not to be programmed, AAA reserves the right, at its sole discretion, to decline any abstract viewed as inappropriate.
• Incomplete submissions will not be programmed.
